DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 12,13 are rejected under 35 U.S.C. 102(b) as being anticipated by Kim et al., U.S. Patent # 6,020,787.

Fig. 11 of Kim et al. discloses a power amplifier comprising: power amplifier 304 can be read as a power amplifier; VVC circuit 506 which has variable capacitor 812 can be read as a ferro-electric tunable component (see spec. col. 4, lines 46-48); VVC circuit 506 can be read as a power amplifier output matching circuit; control signal 527 to control variable capacitor 812 can be read as a control line;

Regarding claim 6, variable capacitor 812 can be read as a first ferro-electric tunable component; variable capacitor 814 can be read as a second ferro-electric tunable component; transmission line 820 can be read as an inductive element.

Allowable Subject Matter

Claims 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: prior art does not teach, in combination with other limitations, a third ferro-electric tunable capacitor.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 6,101,102 of Brand et al., # 3,739,299 of Adler, # 6,054,908 of Jackson contain some limitations of the claimed invention.
